

## Pramaan quick start

Bulk certificates with QR verification · [pramaan.stroban.app](https://pramaan.stroban.app)

# Certificates for a whole batch, in eight steps

Design a certificate once, add your participants, and download one PDF per person. With Pro Pass, every certificate also carries a QR code that anyone can scan to check it. Everything is made in your browser.

### Lite

#### Free

- 25 certificates a month
- Small "Made with Pramaan" footer

### Event Pass

#### ₹199 + GST · 2 months

- 200 certificates, no footer
- Several templates, register CSV

### Pro Pass

#### ₹5,999 + GST · 1 year

- 500 verified certificates a year
- QR verify pages, revoke, own ID prefix, print PDF, 300 dpi

## CONTENTS

1. Activate your key
2. Design the certificate
3. Add your logo and institution
4. Add participants
5. Fill in the certificate details
6. Generate the certificates
7. Verify and revoke **Pro Pass**
8. Renew, upgrade and get help

## 1 Activate your key

Your key arrives by email from **hello@stroban.app** (check spam the first time). It looks like **PRM-XXXX-XXXX-XXXX-XXXX**.

1. Open [pramaan.stroban.app](https://pramaan.stroban.app) and tap **Settings** at the top right.
2. Type your institution's name in **Your institution**. It prints on the certificates and shows on verify pages.
3. Paste the key into **Licence key** and tap **Activate**. The button turns into a green **✓ Activated** tag, and the badge at the top shows your plan.

Your pass starts on the day you activate: 2 months for the Event Pass, a year for Pro Pass. To use Pramaan on another computer, paste the same key there.

### Your plan **Pro Pass**

**Pro Pass** (₹5,999/year + GST) · key PRM-7KQ2-M4XD-9PRT-3VNA

500 of 500 verified certificates left this year.

Active until **18 Oct 2027**.

Last checked 18 Oct 2026. Pramaan re-checks about once a week when online.

Licence key

Renew · ₹5,999/year + GST on WhatsApp

Need more than 500 a year? [Get a quote →](#)

Deactivate on this device

Turns the plan off on this device only. Your key keeps working, so you can use it on another device. Certificates you issued keep verifying.

Your pass starts when you activate: 2 months for the Event Pass, a year for Pro Pass. Renewing keeps the same key and adds a term from your end date. Upgrade from the Event Pass to Pro Pass any time: pay the difference (₹5,800 + GST) and the Pro Pass year starts that day.  
If a Pro Pass isn't renewed, issued certificates keep verifying and revoking still works; only new ones stop (after 14 days' grace). Need more than 500 a year? [Get a quote](#).

Settings → Your plan, after activating a Pro Pass key.

## 2 Design the certificate

1. On the **1 Design** tab, tap **Upload background** and choose your certificate design (PNG, JPG or PDF) with the name area left blank. Best size: A4 landscape at 3508 × 2480 px. To practise first, tap **Use sample**.
2. Use **Add a field** on the right to place Name, Designation & affiliation, Course, Date, Certificate ID, QR code, Signature, Logo or your own Text.
3. Drag a field to move it; drag its corner to resize it. Tap a field to change its text, font, size and alignment in the panel on the right.
4. To remove a field, tap it and press **Delete** in that panel. **Duplicate** makes a copy.
5. Under the certificate, set **Preview with** to **Longest name** to check that long names still fit.

The Name field is selected; its settings, Duplicate and Delete are on the right.

**Fields fill themselves.** Words in double braces are replaced for each person: `{{Name}}` , `{{Course}}` , `{{Date}}` , `{{Issuer}}` , `{{ID}}` . Any column in your participant list works too, such as `{{Roll No}}` . With the Event Pass or Pro Pass you can keep several templates (+ New template).

### 3 Add your logo and institution

1. Go to **2 Participants** and scroll to **Certificate details** → **Institution header**.
2. Upload your **institution logo** and, for joint events, up to two **partner logos**. A PNG with a transparent background, at least 400 px on the longer side, prints best.
3. Add the **department or address line** if you want one under the name.
4. Back on **1 Design**, place them with **+ Institution header** (logo, name and department together) or **+ Logo**.

Logos are saved on each device, so each colleague who uses Pramaan uploads them once.

### 4 Add participants

One row per person. **Name** is required; **Designation**, **Affiliation** and **Email** are recommended, in any order.

1. On **2 Participants**, tap **📶 Upload CSV**. From Excel or Google Sheets: **File** → **Download (or Save as)** → **CSV**.
2. Or tap **Paste instead**, copy the cells from your spreadsheet *including the header row*, paste them, and tap **Use pasted data**.
3. Check the column choices and the preview table. Rows without a name are skipped, and Pramaan warns you about repeated names.

## Participants

One row per person, with a header row. **Name** is required; **Designation**, **Affiliation** and **Email** are recommended. Any other column (Roll No, Paper Title, Grade) becomes a field you can place.

Upload CSV

Paste instead

Sample CSV

Use sample participants

Columns: **Name** (required), Designation, Affiliation, Email, plus any others. Excel or Google Sheets: File → Download (or Save as) → CSV, or download the sample to see the format. The file stays on this device.

**Format:** the first line holds the **column names**, then one person per line. Only **Name** is required; the recommended columns are Name, Designation, Affiliation, Email (any order). Other columns, such as Roll No or Paper Title, also work as `{{Roll No}}`.

- **From Excel or Google Sheets:** select the cells *including the header row* → Copy → paste here. No quotes needed.
- **Typing by hand:** separate values with commas. If a value contains a comma, put it in quotes: "School of Business, SR University".

Start with the header row

Name,Designation,Affiliation,Email  
Priya Rao,Research Scholar,"School of Business, SR University",priya.rao@example.com  
Arjun Mehta,Assistant Professor,Kakatiya University,arjun.mehta@example.com

Use pasted data

Paste straight from Excel or Google Sheets; the first line holds the column names.

## 8 participants

|---|-------------------------------|----------------------------------|-----------------------------------|--------------------------|
| 1 | Priya Rao                     | Research Scholar                 | School of Business, SR University | priya.rao@example.com    |
| 2 | Arjun Mehta                   | Assistant Professor              | Kakatiya University               | arjun.mehta@example.com  |
| 3 | अमित शर्मा                    | Associate Professor              | University of Hyderabad           | amit.sharma@example.com  |
| 4 | సాయి కిరణ్ రెడ్డి             | Research Scholar                 | SR University                     | sai.kiran@example.com    |
| 5 | Dr. Kavya Iyer                | Professor                        | Vardhaman College of Engineering  | kavya.iyer@example.com   |
| 6 | Mohammed Faizal               | MBA Student                      | SR University                     | faizal@example.com       |
| 7 | Ananya Banerjee-Chattopadhyay |                                  | IIM Calcutta                      | ananya.b@example.com     |
| 8 | Rohan D'Souza                 | Manager – Learning & Development | Acme Industries Ltd               | rohan.dsouza@example.com |

Pramaan picks the columns for you; change them here if needed.

The list stays on this device until you tap **Clear**, so you can come back to it later.

## 5 Fill in the certificate details

Under **Certificate details** on the same tab:

- **Course or event** and **Institution name:** printed by `{{Course}}` and `{{Issuer}}`.
- **Date:** the first day. For a multi-day programme add the **End date** and it prints as, for example, "24–26 September 2026".
- **Date format**, with **How it prints** showing the result.

A column with the same name in your list (for example a *Course* column) overrides these for each person.

### Certificate details

Used by the `{{Course}}` `{{Date}}` `{{Issuer}}` fields. A CSV column with the same name overrides these per person.

Course or event

Institution name (`{{Issuer}}`); also shown on verify pages)

Workshop on Design Thinking

Sample Institute of Management

Date (first day, for multi-day events)

End date (optional: multi-day programmes)

10/18/2026

mm/dd/yyyy

Clear

Date format

How it prints

18 October 2026

18 October 2026

### Institution header

Printed by the + **Institution header** and + **Logo** fields on the Design tab. Saved on this device and used by every template.

**Logo size:** PNG with a transparent background (or SVG) works best. Aim for **at least 400 px** on the longer side: about **600 × 600 px** for a round seal or crest, **1000 × 400 px** for a wide logo. Small images (for example 133 × 157 px) look soft in print.

Department, school or address line (`{{Department}}`), optional

Certificate details and the Institution header.

## 6 Generate the certificates

1. Open **3 Generate**. The top row shows the template, how many certificates will be made and how many you have left (*this month* on Lite, *on pass* for the Event Pass, *this year* for Pro Pass).
2. Read the yellow box: it lists anything missing, such as an empty logo or a field with no matching column.
3. **Certificate ID prefix** **Pro Pass** : type your own prefix in the box on the right, under **Your prefix**, for example `SIM-2026` . IDs then look like `SIM-2026-K7Q29XMP` .
4. **Quality** **Pro Pass** : **Normal** suits screens and office printers; **High (300 dpi)** is for professional printing.
5. Tick **Print PDF** **Pro Pass** for one file with every certificate, one per page.
6. Tap **Generate ... certificates**. With Pro Pass, the IDs are registered first, then the PDFs are made on your device.

**Generate certificates**

Template  
**Sample certificate**

Certificates  
**8**

Left this year  
**500** of 500

Page  
**A4 landscape**

Quality  
**150 dpi**

• The certificate has a place for your institution logo and a partner logo but none is uploaded, so it stays blank. [Upload it](#) or delete that field if you don't need it.

**QR verification** On  
Each certificate gets a unique ID and a QR code that opens `pramaan.stroban.app/v/` showing name, course, date and issuer. Revocable later.

**Certificate ID prefix**  
Type your own prefix in the box on the right, e.g. SRU-2026 (letters, digits and dashes). IDs look like SIM-2026-K7Q29XMP.

Your prefix

**Quality**  
Normal (150 dpi) is right for screens and office printers. High (300 dpi) for professional printing; files are about 3× larger.

Normal
High

**Also make a print-ready PDF**  
Every certificate in one PDF, one per page, for bulk printing. The ZIP always has one PDF per person plus a register CSV (names, IDs, verify links) for mail merge.

☒ Print PDF

Generate 8 certificates

IDs are registered first, then the PDFs are made on this device.

The prefix box is on the right of "Certificate ID prefix".

You get a **ZIP with one PDF per person**, plus (with the Event Pass or Pro Pass) a **register CSV** listing every name and ID, and with Pro Pass the verify link of each certificate. **Keep the register CSV**: it is your copy of every verify link, handy for mail merge.

**8 certificates ready and registered.** Their QR codes work now. Keep the register CSV: it's your copy of every verify link. 492 of 500 verified certificates left this year.

↓ Register CSV (2 KB)

Open Priya's verify page ↗

[Something wrong with these certificates? Tell us](#)

## 7 Verify and revoke Pro Pass

Each certificate's QR code opens its own page at **`pramaan.stroban.app/v/`**, showing **Valid** with the name, course, date and issuer. Anyone can also type a certificate ID there; the name stays hidden until they type the printed name, which Pramaan then checks.

On the **✓ Issued** tab you can:

- search by name or ID;
- **Copy link** or **Open** a certificate's verify page;
- **Revoke** a certificate issued in error, with a reason shown on its page, and **Restore** it later.

A change shows on the verify page within a minute or two. The Issued list is kept on the device that made the batch; the register CSV is your backup.

**Praamaan** · certificate verification

**Valid certificate**  
Registered by the issuer on 18 Oct 2026

**Priya Rao**

Course / event **Workshop on Design Thinking**

Date **18 October 2026**

Issued by **Sample Institute of Management**  
Institution name as entered by the issuer

Certificate ID **SIM-2026-CBHHYLUK**

**Check another certificate**

Certificate ID, e.g. SRU-2026-K7G

This page shows only what the issuer registered: the holder's name, the course or event, the date and the issuer. The name is stored encrypted; the key to read it is in the QR code's link and is never sent to our server.

What a scan shows on a phone.

Issued: every batch made on this device.

**Your names stay private.** Our registry keeps only the ID, course, date, issuer and the name in encrypted form. The key that unlocks the name is inside the QR link and is never sent to us. No email addresses leave your device.

## 8 Renew, upgrade and get help

- **Reminders.** We email you 7 days before an Event Pass ends and 14 days before a Pro Pass ends. Tap **Renew** in Settings to message us on WhatsApp; renewing keeps the same key and adds a full term from your end date.
- **Upgrade** from the Event Pass to Pro Pass any time: pay the difference (₹5,800 + GST) and your Pro Pass year starts that day. After we confirm, tap **Check now** in Settings.
- **If a Pro Pass isn't renewed,** every certificate you issued keeps verifying and you can still revoke; only new verified certificates stop, after 14 days' grace.
- **Need more than 500 certificates a year?** Tap **Get a quote** in Settings or on the plans sheet for an institution plan.
- **Shared computer?** When you finish, keep your register CSV, then use **Settings** → **Deactivate on this device** and **Delete all local data**.
- **Install it.** **Settings** → **Install Pramaan** adds it to your home screen or desktop.
